TWO SECTIONS JANUARY, 1943 SECTION 2

# S·A·E JOURNAL

## Index to Volume 50

JANUARY-DECEMBER, 1942

SOCIETY OF AUTOMOTIVE ENGINEERS, 29 West 39th Street, New York

Engineering Library
Direct

# General Editorial Section

## Author Index

| Author | Title of Paper | Page |
|---|---|---|
| Alden, C. R., and R. K. Weldy | A New Fuel Injection Nozzle for High-Speed Diesel and Gasoline-Injection Engines | Fe 63 |
| Alden, Col. H. W. | Some Observations on Current Military Problems | My 38 |
| Allbright, Rex, and F. G. Shoemaker | Piston Rings and Oil Control in Two-Cycle High-Output Diesel Engines | Jl 50 |
| Almen, J. O. | Dimensional Value of Lubricants in Gear Design | Je 38 |
| Anderson, B. T.; C. C. Moore, and R. I. Mahan | Diesel Engine Fuel Developments | Je 46 |
| Anderson, Lt.-Com. Harrison F., and Lt.-Com. J. D. Mooney | Give Production Men a Green Light | (P) Jl 29 |
| Anderson, S. K., and P. A. Scherer | Intercoolers and Their Performance in Aircraft | No 60 |
| Armstrong, Col. Donald | American Light Tanks in the Philippines and North Africa | Ap 43 |
| Arnold, Lt.-Gen. H. H. | The Army Air Forces | (P) No 23 |
| Baird, J. W. | Crashproof Fuel Tanks | Ap 38 |
| Ball, Thomas M., and Sidney Oldberg | Design Features of the Junkers 211B Aircraft Engine | Ap 23 |
| Barnes, J. T., and W. A. Collins | Templet Duplication by Dry Offset Printing | No 61 |
| Barton, K. E. | Industrial England Under War Conditions | Mr 28 |
| Bates, Curtis L., and Harold J. Black | Wood-Plastics in Mass Production of Aircraft | No 62 |
| Beall, A. L.; O. C. Bridgeman; H. A. Everett, and F. L. Miller | Cooperative Engine Wear Studies | Fe 64 |
| Beard, M. G. | Fuel Consumption from the Airline's Viewpoint | Ap 37 |
| Beardslee, Major Leonard L. | Training of Drivers for Army Motorized Equipment | Oc 24 |
| Benning, W. F., and M. C. Horine | Six-Wheel Braking and Its Related Problems | Fe 62 |
| Berlin, Don R. | Designing Aircraft for War Production | Je 42 |
| Biggers, R. L. | Retooling for Arms Manufacture | Mr 28 |
| Bissell, T. A. | Designing for Alternate Materials | Fe 50 |
| Black, Harold J., and Curtis L. Bates | Wood-Plastics in Mass Production of Aircraft | No 62 |
| Boelter, L. M. K. | Automotive Engineering Activities of the University of California | My 46 |
| Bogen, J. S. | Ignition Accelerators for Compression-Ignition Engine Fuels | Fe 63 |
| Bogen, J. S. | The Octane Number – a Meaningless Value? | My 48 |
| Bonham, L. D. | Non-Critical Materials for Airframe Construction | No 61 |
| Bornstein, Hyman | The Changing Picture in Alloy Steels | De 30 |
| Bourne, J. P. | Lubrication of the Diesel Power Plant | Fe 74 |
| Boyd, T. A. | Your 1972 Model – I'd Like to Drive It | Fe 20 |
| Bridgeman, O. C.; H. A. Everett; F. L. Miller, and A. L. Beall | Cooperative Engine Wear Studies | Fe 64 |
| Briggs, Paul | Types of Propellers and Installations | My 46 |
| Brislawn, Lt. E. J. | Third Ordnance Company | Fe 72 |
| Brower, Gilbert K. | Re-refining of Aircraft Engine Oils | De 24 |
| Brown, A. A. | Icing of Aircraft-Engine Induction Systems | Jn 22 |
| Burnham, W. E. | Controllable Pitch Propellers for Light Airplanes | Fe 58 |
| Burton, S. C. | Advantages of Diesel Power in Aircraft | Jl 56 |
| Burwell, J. T. | The Role of Surface Chemistry and Profile on Boundary Lubrication | Ap 34 |
| Buttner, H. J. | Allison Production Testing Facilities | Ap 33 |
| Campbell, J. M.; R. J. Greenshields; W. M. Holaday, and C. B. Veal | 1941 CFR Road Detonation Tests | Fe 65 |

**Abbreviations Used:**

Months of the Year

| | | | |
|---|---|---|---|

# AUTHOR INDEX

| Author | Title of Paper | Page |
|---|---|---|
| Campbell, Major-Gen. Levin H., Jr. | A Message to SAE Members | (P) Jl 39 |
| Cannon, Wayne D. | Requirements for Carburetor Air Filters for Aircraft Engines | No 37 |
| Carpenter, A. W.; W. J. McCortney; E. G. Kimmich, and L. A. Danse | Progress on Standardization of Automotive Rubber Specifications and Tests | Fe 51 |
| Carpenter, S. R. | How Vultee Uses Master Layout for Production | No 61 |
| Cattaneo, A. G.; T. A. Rogers, and H. R. Luck | New Methods for the Evaluation and Recording of Piston Skirt Deposits | De 30 |
| Chalmers, Douglas | The Synthetic Rubber Picture as a Whole | No 83 |
| Chapman, E. S. | Conversion of Plants to Wartime Work | Fe 21 |
| Chayne, C. A. | Buick Production Engine Testing | Ap 33 |
| Chesnut, Fred H. | Tire Maintenance | Ag 29 |
| Chevalier, Col. Willard | This Business of War | Jl 49 |
| Chilton, Roland | Effects of Air Raids on England | Fe 20 |
| Churchill, W. W. | Civilian Automotive Instructors in the U. S. Army | No 81 |
| Clark, R. H. | Welding in Maintenance | Fe 60 |
| Clark, William M. | Post-War Transportation | Je 47 |
| Clayden, A. Ludlow | Gasoline – Past, Present and Future | My 40 |
| Colby, Lt.-Col. Joseph M. | Experience with Automotive Equipment in the Field | De 36 |
| Cole, Otis D. | Buna S, Buna N, and Butyl | Oc 18 |
| Collins, W. A., and J. T. Barnes | Templet Duplication by Dry Offset Printing | No 61 |
| Colwell, A. T. | Behind the Scenes in War Engineering | Oc 33 |
| Colwell, A. T. | Engineering for War and the Blitzkrieg | My 40 |
| Colwell, A. T. | Valves for Wartime Requirements | De 32 |
| Cowan, H. N. | Salvage Practices in Aircraft Manufacture | Fe 61 |
| Crawford, F. C. | Free Enterprise and the Post-War Blueprint | Jn 22 |
| Crawford, F. C. | The Engineer in the War and After the War | Oc 18 |
| Cumming, W. J. | Building Up of Worn Parts | Fe 60 |
| Cumming, W. J. | Highway to Victory | No 35; (P) De 15 |
| Curtis, Robert M. | Sea Sledding to Victory | (P) Je 40 |
| Custer, Kenneth G. | Belt Development | No 83 |
| Danse, L. A.; A. W. Carpenter; W. J. McCortney, and E. G. Kimmich | Progress on Standardization of Automotive Rubber Specifications and Tests | Fe 51 |
| Davidson, W. J. | Fundamentals Involved in the Design of Army Vehicles | Jl 46 |
| Davies, A. W. | Aircraft Master Tooling | Je 43 |
| Davies, W. W., and R. D. Kelly | Engineering Problems Associated with Air Cargo Transportation | Ap 36 |
| DeJuhasz, K. J. | An Optical Oscillograph for Engine Investigation | Fe 63 |
| DeSilva, H. R. | Automotive Maintenance Under Present Day Conditions – Civilian and Military | Ap 39 |
| Devers, Major-Gen. Jacob L. | Field Maintenance of Tanks | (P) Je 15 |
| Dickinson, W. T. | Flight Testing Equipment for Large Aircraft | No 37 |
| Dolza, John | Correlation of Ground and Altitude Flight Tests of Oil Systems | Jl 31 |
| D'Orr, Paul B. | The Tire Situation – What Must Be Done | Oc 15 |
| Drake, C. F. | Precision Governing of Diesel Engines | Fe 71 |
| Drew, P. W. | Facts About Our Rubber Situation | Ap 41; (P) My 15 |
| DuBois, Ralph N. | Production Test Equipment for Packard-Built Rolls-Royce Aircraft Engines | Ap 33 |
| Dudley, William | Nationwide Gasoline Rationing | De 37 |
| Eastman, Joseph B. | Facing the Supreme Challenge | (P) Jl 26 |
| Ellor, J. E. | Principles of Pressure Cooling | No 37 |
| Endsley, Lt. L. E., Jr., and R. S. Wetmiller | Effect of Diesel Fuel on Exhaust Smoke and Odor | Jl 54 |
| Everett, H. A.; F. L. Miller; A. L. Beall, and O. C. Bridgeman | Cooperative Engine Wear Studies | Fe 64 |
| Fales, Dean A. | Civilian Wartime Motor Vehicle Problems | (P) De 36 |
| Faulkner, F. L. | Maintenance Problems Resulting from Low Octane Fuels | Fe 58 |
| Fiedler, A. C. | The Farm Equipment Situation from a Farm Operator's Point of View | De 31 |
| Fisher, Master Sgt. Allen G. | Army Maintenance | De 34 |
| Fisher, H. M. | The Rubber Problem | Se 38 |
| Flader, Frederic E. | Aerodynamic Problems in Modern Aircraft | My 39 |
| Flowers, Daniel F., and Fred F. Flowers | High-Altitude Railcars in Bolivia | Je 45 |
| French, Gerthal | Lubricants | De 37 |
| Friend, P. E. | The Use of Expander-Type Rings to Prevent Excessive Cylinder Reconditioning | No 35 |

# Index to Transactions

## Author Index

THE Index for the Transactions Section of the SAE Journal for 1942 is printed on the following pages. Page numbers for this Section are consecutive from January to December. The table below indicates the pages contained in each issue:

| | | | | | |
|---|---|---|---|---|---|
| January | 1-36 | May | 169-208 | September | 373-416 |
| February | 37-72 | June | 209-252 | October | 417-464 |
| March | 73-124 | July | 253-320 | November | 465-508 |
| April | 125-168 | August | 321-372 | December | 509-548 |

*Following the Transactions Index there is printed the General Editorial Section Index.*

| Author | Title of Paper | Page |
|---|---|---|
| Ainsley, W. G.; H. D. Young, and M. L. Hamilton | A Cetane-Number Study of Diesel Fuels | 160 |
| Almen, J. O. | Dimensional Value of Lubricants in Gear Design | 373 |
| Almen, J. O. | Facts and Fallacies of Stress Determination | 52 |
| Bachman, B. B. | Diesel Engines for Trucks – Why and When | (E) 51 |
| Baird, J. W. | Crashproof Fuel Tanks | (E) 345 |
| Baldwin, H. C.; Bert H. Lincoln, Frank A. Suess, and W. A. Jones | Changes Occurring in Oils and Engines from Use | 196 |
| Ball, Thomas M., and Sidney Oldberg | Design Features of the Junkers 211B Aircraft Engine | 465 |
| Beard, M. G. | Fuel Consumption from the Airline's Viewpoint | 484 |
| Beemer, Paul K., and F. C. Lindvall | Dynamically Stable Spring Suspension for Railway Cars and Motorcoaches | 521 |
| Benning, W. F., and M. C. Horine | Six-Wheel Braking and Its Related Problems | 381 |
| Biggar, P. E. | Possibilities of Increasing Automotive-Engine Output | (E) 251 |
| Billingsley, W. F.; R. D. Evans, W. H. Hulswit, and E. A. Roberts | Rolling Resistance of Pneumatic Tires as a Factor in Car Economy | 37 |
| Boyd, T. A. | The 1972 Model – I'd Like to Drive It | 402 |
| Brooks, Donald B., and Robetta B. Cleaton | The Precision of Motor Fuel Testing | 392 |
| Buckwalter, T. V. | Roller Bearings and National Defense | 20 |
| Burnham, Walter E. | Controllable Pitch Propellers for Light Airplanes | (E) 357 |
| Burwell, J. T. | The Role of Surface Chemistry and Profile in Boundary Lubrication | 450 |
| Buttner, H. J. | Production Testing Facilities | 444 |
| Campbell, J. M.; R. J. Greenshields, W. M. Holaday, and C. B. Veal | 1941 CFR Road Detonation Tests | 458 |
| Clark, R. H. | Welding Keeps Them Rolling | (E) 138 |
| Cleaton, Robetta B., and Donald B. Brooks | The Precision of Motor Fuel Testing | 392 |
| Cumming, W. J. | Building Up of Worn Parts | 139 |
| Curtis, R. R., and W. H. Curtis | Fuel Feed at High Altitude | 321 |
| Curtis, W. H., and R. R. Curtis | Fuel Feed at High Altitude | 321 |
| Davies, W. W., and R. D. Kelly | Engineering Problems of Air Cargo Transportation | 492 |
| Delzell, H. W., and Robert Mayne | The "Square-Wheel" Tractor Goes to Town | 97 |
| Doman, Carl T. | Light Plane Engines and Their Fuel Problems | 188 |
| Dunn, J. W. | Airplane Quality Control | (E) 72 |
| Ellerbrock, H. H., Jr. | Cooling Characteristics of Submerged Light Aircraft Engines | 7 |
| Endsley, Capt. L. E., Jr., and R. S. Wetmiller | Effect of Diesel Fuel on Exhaust Smoke and Odor | 509 |
| Evans, R. D.; W. H. Hulswit, E. A. Roberts, and W. F. Billingsley | Rolling Resistance of Pneumatic Tires as a Factor in Car Economy | 37 |
| Faulkner, F. L. | Commercial Vehicles and Lower-Octane Fuels | 132 |
| Fitzsimmons, J. T. | The Ignition System as Influenced by Fuel Characteristics | 15 |
| Forester, M. A.; C. R. Paton, and R. F. Kohr | Automobile Engineering Organization and Procedure | 439 |
| Fox, L. W. | Selection of Tires for Better Earth-Moving Efficiency | (E) 176 |

(E) indicates excerpt published.

# AUTHOR INDEX

| Author | Title of Paper | | Page |
|---|---|---|---|
| Geschelin, Joseph | Conversion for War | | 276 |
| Greenshields, R. J.; W. M. Holaday, C. B. Veal, and J. M. Campbell | 1941 CFR Road Detonation Tests | | 458 |
| Hamilton, M. L.; W. G. Ainsley, and H. D. Young | A Cetane-Number Study of Diesel Fuels | | 160 |
| Holaday, W. M.; C. B. Veal, J. M. Campbell, and R. J. Greenshields | 1941 CFR Road Detonation Tests | | 458 |
| Horine, M. C., and W. F. Benning | Six-Wheel Braking and Its Related Problems | | 381 |
| Hubner, William H. | Commercial Vehicles and Lower-Octane Fuels | | 125 |
| Hulswit, W. H.; E. A. Roberts, W. F. Billingsley, and R. D. Evans | Rolling Resistance of Pneumatic Tires as a Factor in Car Economy | | 37 |
| Hunter, D. U.; E. S. Taylor, C. F. Taylor, and G. B. Wood, Jr. | Air Flow through Intake Valves | | 212 |
| James, William S. | Problems of Changing from Aluminum to Cast-Iron Pistons | | 177 |
| Jardine, Frank | Effect of War Development on Post-War Car Design | | 299 |
| Jones, W. A.; H. C. Baldwin, Bert H. Lincoln, and Frank A. Suess | Changes Occurring in Oils and Engines from Use | | 196 |
| Kelly, R. D., and W. W. Davies | Engineering Problems of Air Cargo Transportation | | 492 |
| Kendrick, James B. | Ground Versus Flight Tests of Airplane Engine Installations | | 241 |
| Kimball, Leo B. | Icing Problems in Aircraft Induction Systems | | 40 |
| Kincaid, F. M., Jr. | Two-Speed Supercharger Drives | | 80 |
| Klemgard, Edwin N. | Heavy-Duty Lubricating Oils for Naval Diesel Engines | | 284 |
| Kohr, R. F.; M. A. Forester, and C. R. Paton | Automobile Engineering Organization and Procedure | | 439 |
| Koppen, Otto C. | Lightplane Design and Development | (E) | 371 |
| Kudlich, Donald U. | Engineering Liaison and Production Control | | 169 |
| Lane, Paul S., and Stuart Nixon | Engineering Piston Rings for High-Speed Diesels | | 528 |
| Lee, Walter | Selection of Earth-Moving Tires for Better Performance and Economy | | 73 |
| Lent, Col. L. B. | Invention for Victory | (E) | 313 |
| Lincoln, Bert H.; Frank A. Suess, W. A. Jones, and H. C. Baldwin | Changes Occurring in Oils and Engines from Use | | 196 |
| Lindvall, F. C., and Paul K. Beemer | Dynamically Stable Spring Suspension for Railway Cars and Motorcoaches | | 521 |
| Lord, J. Willard | Design Elements Affecting Safety | | 1 |
| Lord, J. Willard | Winning the Battle of Maintenance | (E) | 298 |
| MacCoull, Neil; E. A. Ryder, and A. C. Scholp | An Oil Corrosion Tester | | 338 |
| Mayne, Robert, and H. W. Delzell | The "Square-Wheel" Tractor Goes to Town | | 97 |
| Mock, Frank C. | Aircraft Carburetor Airscoops and Their Effect on Fuel-Air Metering in Flight | | 102 |
| Moller, Joseph A., and Harry C. Mougey | The Testing of Heavy-Duty Motor Oils | | 417 |
| Morse, A. L. | Development of Impact-Resistant Windshields | (E) | 319 |
| Mougey, Harry C., and Joseph A. Moller | The Testing of Heavy-Duty Motor Oils | | 417 |
| Nixon, Stuart, and Paul S. Lane | Engineering Piston Rings for High-Speed Diesels | | 528 |
| Oldberg, Sidney, and Thomas M. Ball | Design Features of the Junkers 211B Aircraft Engine | | 465 |
| Ovens, W. G. | Some Notes on Design Features of the Mitsubishi Kinsei Engine | | 253 |
| Paton, C. R.; R. F. Kohr, and M. A. Forester | Automobile Engineering Organization and Procedure | | 439 |
| Peterson, H. W. | Recent Progress in Ocean Air Transport | (E) | 416 |
| Randolph, D. W. | Aircraft-Engine Radio Shielding | | 538 |
| Raymond, Leonard | Bearings and Bearing Corrosion | | 533 |
| Roberts, E. A.; W. F. Billingsley, R. D. Evans, and W. H. Hulswit | Rolling Resistance of Pneumatic Tires as a Factor in Car Economy | | 37 |
| Roche, Paul C. | Engine Smoothness and Protection through Shear Rubber Mountings | | 314 |
| Round, George A. | Fuels and Lubricants Procured by The Quartermaster-General for U. S. Army Motorized Ground Forces | | 207 |
| Ryde, John L. | The Positive-Displacement Supercharger | | 304 |
| Ryder, E. A.; A. C. Scholp, and Neil MacCoull | An Oil Corrosion Tester | | 338 |

(E) indicates excerpt published.

### Accidents and Accident Prevention

ADVANTAGES OF COMPULSORY MOTOR-VEHICLE INSPECTION (E) 19
DESIGN ELEMENTS AFFECTING SAFETY 1
DEVELOPMENT OF IMPACT-RESISTANT WINDSHIELDS (E) 319
Aircraft
  Collision with birds 319
  Education as factor 151, 152
  Engine problems 142
  Pilot responsibility 372
  Private flying operations data 142
  Vision, improvement needed 101
  Windshields, impact-resistant 319, 320
Automobile, causes 407
Diesel fuel as factor 160
Motorcoach
  Design factors
    Brakes 19
    Importance of 19
  Preventive, compulsory inspection 19
Motor-truck
  Design factors
    Brakes 5, 6, 19
    Cabs
      Mirrors 2, 3
      Pitching 2
      Seating 2
      Steps 2, 4
      Ventilators 2
      Visibility 1, 2
      Windshields 2
    Controls 3
    Importance of 19
    Lights 3, 4
    Springs 5
  Driver comfort 2
  Fatigue factor 2
  Fire protection 5
  Legislative effects 5, 6
  Maintenance factor 6
  Preventives
    Design improvements 1
    Driver comfort 2
    Inspection, compulsory 19
  Problem analyzed 1
Motor-vehicle inspection, compulsory 19

### Aircraft Design and Construction

CONTROLLABLE PITCH PROPELLERS FOR LIGHT AIRPLANES (E) 357
CRASHPROOF FUEL TANKS (E) 345
DEVELOPMENT OF IMPACT-RESISTANT WINDSHIELDS (E) 319
GROUND VERSUS FLIGHT TESTS OF AIRPLANE ENGINE INSTALLATIONS 241
LIGHTPLANE DESIGN AND DEVELOPMENT (E) 371
PRODUCTION BREAKDOWN ILLUSTRATION 408
PROGRESS IN STRUCTURAL DESIGN THROUGH STRAIN-GAGE TECHNIQUE 346
REQUIREMENTS FOR TOMORROW'S LIGHT PLANE (E) 101
Aluminum used in 210, 211
Breakdown illustration 408
Cargo transportation requirements 496, 497, 498
Engine installation testing 241
Fuel tanks
  Bullet-proof 345
  Construction principles involved 345
  Crashproof 345
  Improvement needed 485
  Mounting 345
  Self-sealing 345
Illustration, breakdown 408
Light airplanes
  Design requirements 371, 372
  Improvement needed 101
  Landing speed 371, 372
  Military use 371
  Progress 101; 371
  Propellers 357
  Requirements 101
  Wings
    Drag 372
    Loading 371

### Aircraft Operation and Performance

ENGINEERING PROBLEMS OF AIR CARGO TRANSPORTATION 492
ICING PROBLEMS IN AIRCRAFT INDUCTION SYSTEMS 40
Cargo transportation
  Cargo compartment
    Equipment 496
    Location 496, 497
    Supercharging 497
    Temperature control 496, 497
    Ventilation 496, 497
  Cargo types, problems involved 497
  Cost data 494, 495
  Design factors 496, 497, 498

PAGE

**Aircraft Operation and Performance (Concluded)**

- Equipment requirements 494, 495, 498
- Future predicted 492
- Ground handling 492, 493, 498
- Handling within airplane 496, 497, 498
- Packaging 498
- Payload 494, 495
- Safety considerations 497
- Schedule reliability 492, 493
- Time element 492, 497, 498
- Weight factor 495

Climb 488
Collision with birds, effects of 319
Failure causes 146, 147, 148
Flight Log 484, 485, 487
Flight Plan 484, 486
Flight tests, ground tests compared with 241
Fuel consumption from airline viewpoint 484
Ice formation
- Data 40, 49
- De-icing methods 40
- Types 40

Light airplanes
- Climb 372
- Design requirements 371, 372
- Landing speed 371, 372
- Noise 372
- Pilot training 371, 372
- Private flying operations 142
- Safety 372
- Speed factor 371
- Take-off run 372
- Trip length 371

Makes, Douglas 484
Passenger transportation 493, 494
Payload 494, 495
Private flying operations data 142
Propellers
- Dynamic balancing 488
- Failures 146, 147
- Noise 157, 158
- Vibration 158

Take-off 487
Taxiing 486
Testing
- Flight 241
- Vibration 245, 246, 247

Visibility 158

DYNAMICALLY STABLE SPRING SUSPENSION FOR RAILWAY CARS AND MOTORCOACHES 521
Acoustical treatment 526
Design features 521
Plywood used 523
Springs, suspension 521
Steel stressed-skin construction 525
(See also Springs, Suspension)

**Rims**

(See Tires and Rims)

**Roads and Streets**

Improvements needed 406
Parking 407
Safety problems 407

**Rubber**

ENGINE SMOOTHNESS AND PROTECTION THROUGH SHEAR RUBBER MOUNTINGS 314
RUBBER RESEARCH MOVES THROUGH THREE MAIN CHANNELS (E) 124
Carbon-black usage 124
Damping factor 316, 317
Engine mounting 314, 319
Load deflection 315, 317
Oxidation inhibitors 124
Research 124
Springs, suspension, use of 526
Synthetic
- Buna 474
- Supercharger use 312

Vulcanization 124

**S**

**Safety**

(See Accidents and Accident Prevention)

**Six-Wheel Vehicles**

SIX-WHEEL BRAKING AND ITS RELATED PROBLEMS 381
Bogie construction 388
Bogie hopping 381, 388, 389, 390
Braking problems 381
Four-wheel truck compared with 381, 384, 385
Steering problems 381, 386, 387, 391
Suspension 388, 389
Tires, wear 387
Tractor-semi-trailer compared with 381, 384, 385
Turning radius 387
Weight, legal 391
Weight transfer 382, 383, 384, 385, 386, 388
(See also Brakes)

**Springs, Suspension**

CHARACTERISTICS OF THE VOLUTE SPRING 221
DYNAMICALLY STABLE SPRING SUSPENSION FOR RAILWAY CARS AND MOTORCOACHES 521

PAGE

**Springs, Suspension (Concluded)**

Bottoming 222, 223, 229, 233, 235
Coil
- Deflections 224
- Example of 523
- Loads 224
- Stresses 225
- Types 224

Conical 222, 223
Deflection, static 522, 523, 524, 527
Function 522
Helical 221, 222, 223
Independent wheel
- Merits 527
- Riding qualities affected by 527

Motorcoach
- Above-gravity suspension 521, 522, 523
- Pendulum suspension
  - Conventional compared with 522
  - Merits 522, 527
  - Riding qualities 527
- Stability 522

Railcar
- Above-gravity suspension 521, 522, 523
- Lateral freedom 522
- Location 522
- Pendulum suspension
  - Conventional compared with 522
  - Design principles 523
  - Merits 522, 523, 527
  - Riding qualities 526, 527
  - Testing 526

Rubber used in 526
Six-wheel vehicles 388, 389
Testing 235, 238, 239; 526
Volute
- Advantages 223
- Bulldozing 229, 230
- Curves 232, 233
- Definition 221, 222
- Deflections 224, 227, 230, 236, 237, 238, 239
- Disadvantages 223
- Formulas 225, 226, 227, 231, 235, 236, 237, 238, 239
- Life testing 235, 238, 239
- Loads 224, 226, 228, 230, 236, 237
- Profile line 223
- Stresses 225, 226, 231, 236, 237
- Tapering characteristics 234
- Testing 235, 238, 239
- Weight 235

**Springs, Valve**

Aircraft 471
Design 366, 367, 371; 471
Diesel 366
Frequency 366, 371
